WHY CLEAN YOUR AC & IT'S HEALTH IMPACTS

thehealthyhome.me

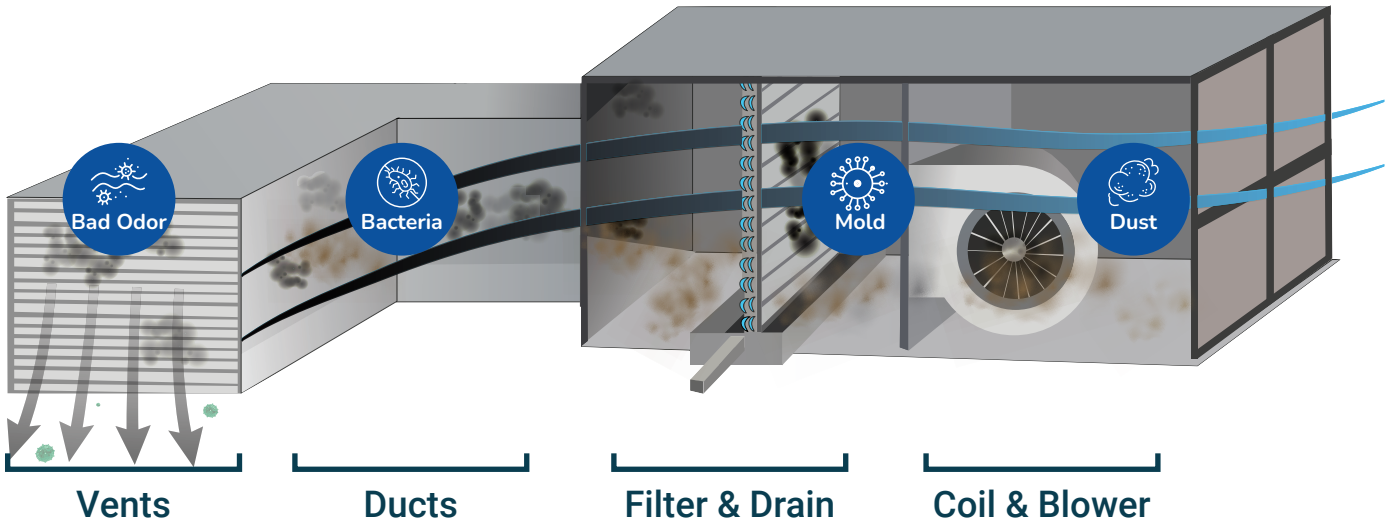

Google 4.9/5 Rating ★★★★★ (7,000+ Reviews)

11,000
liters of indoor air inhaled on average per day

90%
of our times is spent indoors

Indoor air pollution is
2 to 5 times
greater than outdoor pollution

50%
of respiratory illnesses are aggravated by polluted indoor air

SIGNS YOU NEED AN AC CLEANING

- Poor sleep & low energy levels
- Breathing problems, allergy flare-up
- Constant humidity & smell
- Dust or mold on your vents
- Poor or no airflow
- High energy bill

AC FACTS

1. AC needs to be professionally cleaned atleast once a year. Not only when moving to a new house.
2. Majority of building maintenance cleaning companies and home apps do not clean the whole AC system. Always ask for the scope of work!
3. If vents are clean, it doesn't mean that the whole AC system is also clean.
4. Your AC still accumulates & circulates dust and mold even if it's turned OFF!

ALL OUR TREATMENTS ENSURE

- Odor Control
- Better Breathing
- Certified by NADCA© & IAQA
